Skills

Product and UX

Product strategy, UX research and audits, information architecture, journey mapping, usability testing, designing AI features (human review, clear sources)

Interaction and visual

Native iOS patterns, responsive web, interaction design, prototyping, typography, micro-interactions

Systems and delivery

Design systems, components and variants, behaviour specs for engineering, Agile, HTML and CSS basics

Domains

EdTech and childcare, payments and fintech, IoT, healthcare, occupational health, emergency care, e-commerce, inventory management

Profile

Senior product designer with 9+ years of making complex systems simple to use. I design childcare software for Australia and New Zealand: I designed the Xap Care app and web portal from scratch, and after Storypark acquired Xap, I'm now revamping the Storypark Families and Educator apps. I work closely with product and engineering, from research to the final details.

Experience

YoDeP Software

Jun 2025 – Present

Remote · Working with Xap, then Storypark (acquired Xap in 2026)

Product Designer, Storypark

Jun 2026 – Present

Bringing the features I designed at Xap into Storypark, and revamping its apps end to end.

- Designing the end-to-end revamp of the Storypark Families and Educator apps.
- Brought the family booking redesign into Storypark: parents book several children for several dates in one request.
- Moved fee payments into the app, with clear messages while a payment is processing, and if it fails.
- Next: the Xap and Storypark web portals, planned for next year.

Senior Product Engineer (Product Design), Xap

Jun 2025 – May 2026

Web and mobile products that help early learning centres in Australia and New Zealand run their day-to-day work.

- Designed the Xap Care app from scratch. Its features moved into Storypark after the acquisition.
- Designed the Xap web portal for desktop and mobile browsers: enrolment with state-based steps, nested questions admins can set up, waitlists, SMS and email alerts, and family records.
- Started the family booking redesign: several children, dates and rooms in one flow.

Experience, continued

Solvative
Aug 2018 – Feb 2025

UI/UX Designer, Design Team Lead

Designed IoT and remote-control apps for mobile and web, with simple, mobile-first screens.

- Led a small team of designers on new products and redesigns.
- Sole designer for client products: Examinetics (hearing and respirator fit testing, and a web portal for organisations, workers and test results) and ZOLL Mobilize (the step-by-step emergency app for trauma kits).
- Built and looked after the design system, so screens stayed consistent across products.
- Ran regular UX reviews and usability tests, and turned the findings into design updates.
- Ran design sprints to test product ideas quickly.
- Made handoff to developers smoother with Figma, Zeplin and shared components.

TrooTech Business Solutions
Nov 2017 – Aug 2018

UI/UX Designer

- Designed mobile and web apps for US and UK clients, from client interviews to detailed prototypes.
- Improved checkout flows for client apps through UX reviews and testing.
- Built reusable components for a shared design library.

Simprosys
Jan 2017 – Nov 2017

UI/UX Designer

- Designed Shopify e-commerce stores, starting with user interviews and analytics.
- Reviewed stores for UX problems and suggested design updates.
